Working conditions
At end of the day most of the old men were left (about 20). All these old men are sent to either Yuma or I. V.

That very same day a Yuma selector brought back an old man that lasted only a day and got sun-stroke (He was being sent back to Mex. only 2 days after being contracted).

Danny says that the age limit is 45, but they are letting in much older men at Emps.
